

Paper-Less™ Plant Floor Essentials

"Visibly Better Execution"

Paper-Less Manufacturing Execution Software

Paper-Less, LLC is a wholly owned subsidiary of Information Systems Engineering, Inc. (ISE) specializing in the design and development of advanced shop floor solutions for manufacturers. ISE is an Infor Affiliate with many years of manufacturing operations and information technology experience.

Manufacturing Data Collection & Communications* (MDCC) is a real-time shop floor communications system for Infor. **MDCC** supports labor and inventory transactions, online dispatching of manufacturing orders, electronic documentation, labor and job efficiencies and engineering drawings. A variety of user interfaces are supported including green screen, GUI & RF.

Advanced Transaction Management (ATM) enhances INFOR Production Monitoring & Control application by offering multiple schedules and personal calendars, on-line select and edit, enhanced schedule rounding rules for flextime and overtime, improved absence/vacation/leave tracking and inquiry.

Paper-Less Barcode Labeling System for the iSeries (PBLSi) is a data driven, rules based label configurator that integrates with any AS/400 based manufacturing system. **PBLSi** allows you to easily design barcode labels. Based on the data and the rules you define, you can take the guesswork out of answering these labeling questions: what label for this customer or item, how many and what printer.

ThIn-ventory is a customizable AS/400 solution that allows users access to mission critical inventory information from a wireless handheld device. **ThIn-ventory** is a customizable AS/400 solution that allows users access to mission critical inventory information from a wireless handheld device. Using 'drag and drop' techniques, you can create your own screens, assign default field values, set up workflow like processes or procedures, all using your existing AS/400 application's needs.
