

ThIn-ventory®

The ThIn-ventory® Solution

ThIn-ventory® Advantages:

- *Extends Infor XA applications out to the shop floor*
- *Allows pull downs to aid entry and information exchange*
- *No additional server required*
- *Application Kits accelerate the deployment and reduce start-up time*

With the explosion of the Internet and the advent of new technologies such as Pocket PC's, smart phones and wireless devices, the rules of communication have been re-written. People are no longer willing to wait hours for answers to their questions, they expect answers now.

To support this demand for immediate information access, ThIn-ventory® is offered to help transact and manage information from its source. Whether terminals are mounted to fork lift trucks or carried in the palm of your hand, ThIn-ventory® becomes the conduit to join the mobile user with pertinent iSeries data.

Paper-Less has utilized ThIn-ventory® to develop inventory transactions to serve the mobile worker in the inventory and receiving areas.

The ability to record inventory transactions at their point of origin is provided with ThIn-ventory® transaction kits applied to an Infor XA ERP environment.

ThIn-ventory® Customers use our product to...

- Allow Shop floor employees to access inventory locations and picking lists anywhere in the warehouse.
- Extend Infor XA applications out to the shop floor.
- Provide a Windows look and feel to mobile users.
- Allow pull downs to aid entry and information exchange.
- Offer mobility through the use of handheld or fork lift truck mounted terminals.
- Reduce system maintenance – the iSeries is the only server needed.
- Accelerate the deployment and reduce start-up time through the use of Application kits .

ThIn-ventory®

"Out of the office, on the shop floor, on the dock or simply away from your desk, ThIn-ventory® can provide anyone, with any information, anytime from anywhere "

*John VanKempen
President*

Utilizing our Deployment Tool, Paper-Less could customize ThIn-ventory® to help you...

- Shop floor employees can access inventory locations and picking lists anywhere in the warehouse.
- Shop floor supervisors can look up attendance and job information as they walk through the plant. They can even assign work to employees, reprioritize work or make changes to crews while out on the floor.
- Field personnel with remote access to the iSeries can look up sales, order and collection information while they are on the road without lugging a laptop with them.
- Busy executives can have access to sales, financial and manufacturing information while away from their desk.
- Out of the office, on the shop floor, on the dock, away from your desk. ThIn-ventory® can provide anyone, with any information, anytime from anywhere.
