

# ***PAPER-LESS MDCC RELEASE 8 ENHANCEMENT 8-0004***

## **DESCRIPTION:**

Change the Barcode Entry Screen to allow entry of an Order without requiring an Operation number. When entering only the Order number on the Barcode Entry Screen, the Job On Screen will display the list of all active Operations for the order entered. Any Operations already jobbed on to by the employee will not be displayed in the list.

## **REQUIREMENTS:**

This is a Powerbuilder Only enhancement. A new local tailoring option will be added to the Job On Tab for PB to allow entry of order number only on the barcode entry screen. This only includes the barcode window displayed based on Tailoring set to global display of barcode window. Normal editing occurs when the barcode window is selected from the Job On Order Selection screen.

## **TO ENABLE THIS ENHANCEMENT:**

1. Barcode Routings must be enabled under the Global Options tab in the PowerBuilder Client Tailoring Options screen.
2. Allow order entry only on barcode window must be checked in the Job On Settings tab from the PowerBuilder Client Tailoring screen.
